EXPERIENCE

DevOps Engineer Co-op — Proof (previously Notarize)

Jan 2024 — Sept 2024 · Boston, USA

- Optimized AWS infrastructure with Terraform & CDK — resolved 500+ deprecations and built a Groovy scanner that surfaces future ones as real-time Grafana alerts.
- Cut smoke-test execution time 30% by generating ignore-files that skip non-essential test paths.
- Built D.O.R.A. metrics tooling (Python/Groovy → Metabase) giving the org real delivery-performance insight.
- Led the migration from AWS access keys to IAM roles — tighter security, audit-ready governance.
- Linked test reporting into Azure Data Explorer with KQL analytics, unblocking QA bottlenecks.

Program & Lab Assistant — Northeastern University

Apr 2023 — Dec 2023 · Boston, USA

- Supported 200+ students across Virtual Lab, MATLAB, and RDP environments.
- Automated software installs & environment setup with Shell/PowerShell, with published documentation.

Site Reliability Engineer — Johnson Controls

May 2020 — Jul 2022 · Mumbai, India

- Built CI/CD pipelines for monolith and microservice apps — Jenkins, SonarQube, JFrog, Consul, Vault, Docker, Kubernetes — to ISO/IEC 27001 compliance.
- Deployed centralized ELK logging/monitoring, cutting incident response times.
- Migrated Azure storage data across environments & regions via Jenkins + Azure CLI, halving manual effort.
- Carried 24/7 on-call for production reliability and availability.

PROJECTS

GCP-Native Microservices Platform with AI-Powered Search

- GKE-hosted microservices stack provisioned with Terraform, Helm, and Jenkins — Istio service mesh, TLS via Cert-Manager, ExternalDNS, and full observability (Prometheus, OpenTelemetry, Jaeger).
- AI-powered semantic search over course reviews: GPT-4 + Pinecone + RAG, with Kafka batch-processing PDF ingestion.
- Secrets encrypted with Mozilla SOPS + GCP KMS.
- Custom Go-based Kubernetes operator automating database backups.

Scalable & Secure AWS Web App — CI/CD + Serverless

- Two-tier Flask application on AWS, fully IaC'd with Terraform and shipped via GitHub Actions — RDS, KMS, Packer-built AMIs, EC2 auto-scaling behind an ALB, CloudWatch observability.
- Serverless user-verification flow with Lambda, SNS, and SendGrid.
- DNS infrastructure on Route 53 across multiple subdomains.

SKILLS

Languages	Python, Go, Bash, Groovy, Java, JavaScript, SQL
Containers & Orchestration	Kubernetes, Docker, Helm, Istio
Infrastructure as Code	Terraform, Packer, CloudFormation, ARM, Ansible
CI / CD	Jenkins, GitHub Actions, AWS CodePipeline, CodeBuild, CodeDeploy
Observability	Prometheus, Grafana, OpenTelemetry, Jaeger, CloudWatch, ELK
Cloud	AWS, Azure, GCP
Databases	PostgreSQL, MySQL, MongoDB, Redis

EDUCATION

Northeastern University — MS, Computer Information Science (GPA 3.8 / 4.0)	2022 — 2025
Vishwakarma Institute of Technology — B.Tech, Electronics & Instrumentation (GPA 8.7 / 10)	2016 — 2020

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) — CNCF
